**Director, Integrated Health Sciences Department**  
Global Health, Population & Nutrition Group (GHPN)  
Location: Durham NC, or Washington DC  
Req. ID: 2845

FHI 360 is currently seeking a dynamic leader to be Director of the newly established **Integrated Health Sciences Department** in our Global Health, Population & Nutrition (GHPN) Group. This Director and department will address the most important emerging global health problems. GHPN also includes departments of Global Health Communications, Program Sciences, Nutrition and Food Security, Social and Behavioral Health Sciences, Quantitative Sciences and Science Facilitation. The Director of Integrated Health Sciences will become a member of the leadership of this large group that plays a key role in FHI 360’s mission by providing *The Science of Improving Lives*.

FHI 360 is committed to recruiting a world class scientist with demonstrated management capability to lead a strong, exciting portfolio of research and programs. This position will lead and manage a large multidisciplinary team of 60+ headquarters professionals, including 15 doctoral level scientists and a large (>100) international field-based team. The Department conducts an exciting portfolio of research and programs on HIV/AIDS, infectious diseases, clinical and epidemiological sciences and contraceptive technologies intended to improve lives worldwide. This team is involved in such important projects as:

- A clinical trial of an oral antiretroviral drug to prevent HIV in African women
- Development of improved methods of estimating HIV incidence in populations
- Evaluation of a new device for voluntary medical male circumcision
- Capacity building for partners in international HIV/AIDS programs
- Developing capacity among minority-led HIV/AIDS organizations in the United States
- Development of a longer acting injectable contraceptive
- Engagement of the private sector in disease control programs in India and Nepal
- A comprehensive malaria prevention program in Africa
- A global tuberculosis control program
- A control program for neglected tropical diseases

The **Director, Integrated Health Sciences** will be a vital member of FHI 360’s senior scientific leadership. She/he will report to the Group Director, Global Health, Population and Nutrition and will contribute substantively to forming FHI 360’s strategic plan and goals. She/he will be instrumental in shaping and guiding the new department’s mission, vision and goals. The new leader must have a passion for global health and development, a commitment to scientific and technical excellence, and a keen interest in locally driven solutions. The position can be located either in Durham, N.C. or Washington D.C.

Our current FHI 360 staff includes experts in health, education, nutrition, environment, economic development, civil society, gender, youth, research and technology – creating a unique mix of capabilities to address today’s interrelated development challenges. FHI 360 serves more than 60 countries, all 50 U.S. states and all U.S. territories.
