FHI 360 is currently seeking a dynamic leader to be Director of the newly established Global Health Research Department in our Global Health, Population & Nutrition Group (GHPN). This Director and department will address the most important emerging global health issues, as well as advance understanding of established challenges. GHPN includes departments of Science Facilitation, Contraceptive Technology Innovation, Nutrition & Food Security, Program Sciences & Technical Support, and Global Health Programs. The Director of Global Health Research will become a member of the senior leadership of this large group that plays a key role in FHI 360’s mission by providing The Science of Improving Lives.

FHI 360 is committed to recruiting a world class scientist with demonstrated management capability to lead a robust, exciting portfolio of health research and a team of professionals dedicated to rigorous biostatistics and data management. The position will lead and manage a large multidisciplinary team of 60+ headquarters professionals, including 20 doctoral-level scientists. Examples of the important projects being conducted in the department include:

- Evaluating the performance and safety of medical male circumcision devices
- Assessing the associations between hormonal contraception and HIV acquisition
- Assessing adherence measurement of ARV-based vaginal rings
- Conducting a randomized control trial of two intrauterine devices in HIV-positive women southern Africa

The Director, Global Health Research will be a vital member of FHI 360’s senior scientific leadership. She/He will report to the Director, Global Health, Population & Nutrition and will contribute to FHI 360’s strategic plan and goals. She/He will be instrumental in shaping and guiding the new department’s mission, vision and goals. The new leader must have a passion for global health and development, a commitment to scientific and technical excellence, and a keen interest in generating evidence to address key public health concerns. The position will be located in Durham, NC.

Our current FHI 360 staff includes experts in health, education, nutrition, environment, economic development, civil society, youth, research, and technology – creating a unique mix of capabilities to address today’s development challenges. FHI 360 serves more than 60 countries and all 50 US states and territories.
